Credit Card Customer Churn

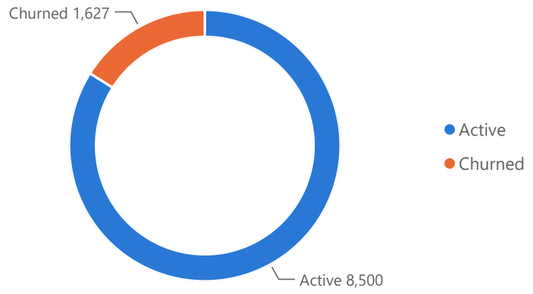

10,127 customers | 16.1% churned in the last 12 months

Overview | Churn Drivers | Retention Watchlist

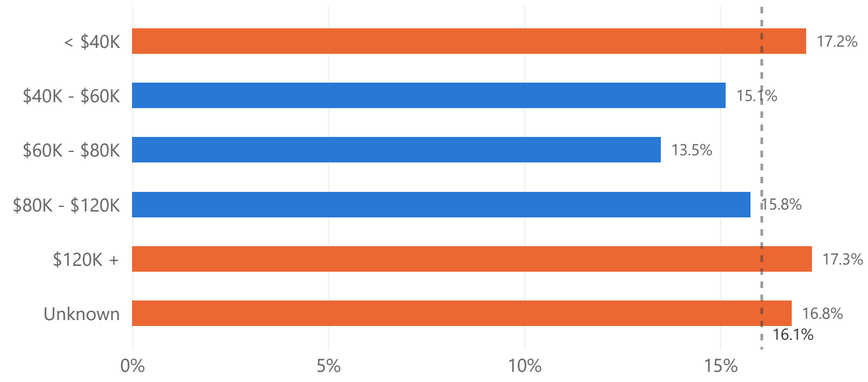

Gender: All | Income: All | Card: All | Education: All

Total Customers	Churned Customers	Churn Rate	Avg Credit Limit	Avg Utilization
10,127	1,627	16.1%	$8,632	27.5%

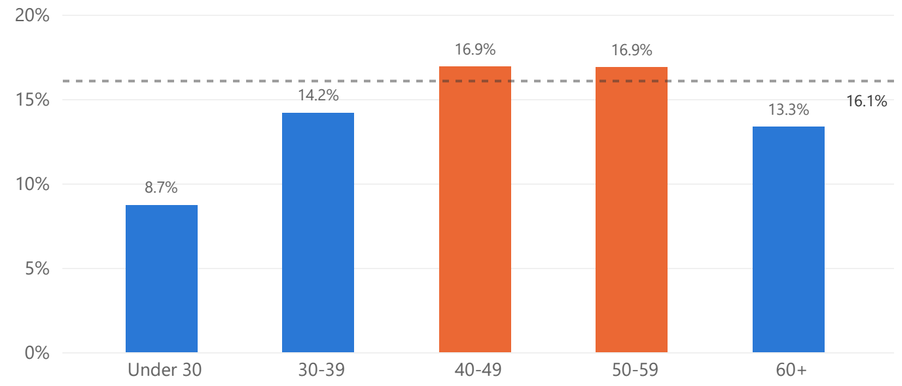

Customer status

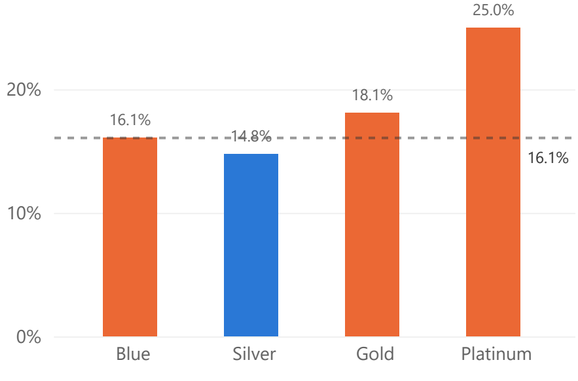

Churn rate by income

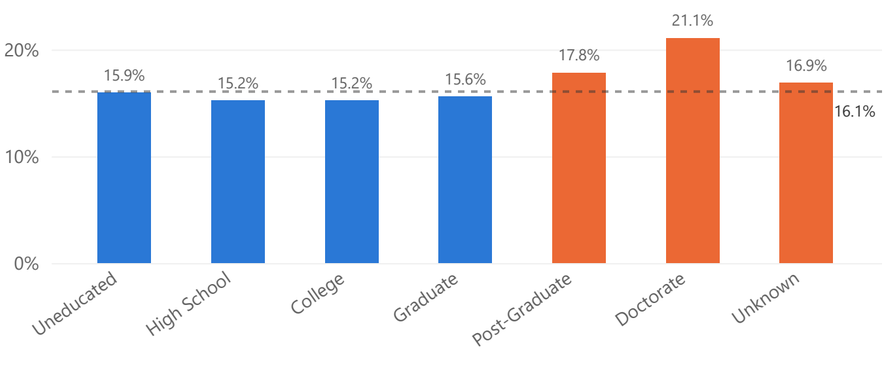

Churn rate by age group

Churn rate by card category

Churn rate by education

Key takeaway

Who the customer is barely changes churn. Across income bands churn only ranges 13%–17%, and age, gender and education look similar. The real signal is in how customers use the card → see Churn Drivers.

What drives churn

Behaviour, not demographics: transaction activity, balances and service contacts

Overview | Churn Drivers | Retention Watchlist

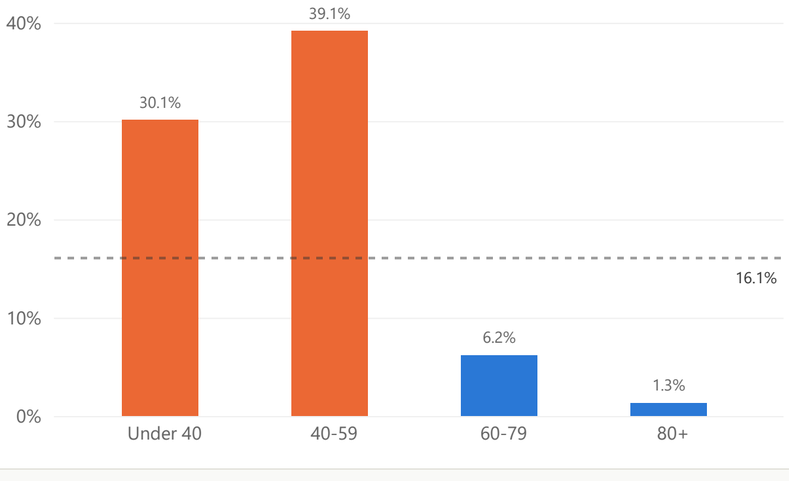

Gender: All

Income: All

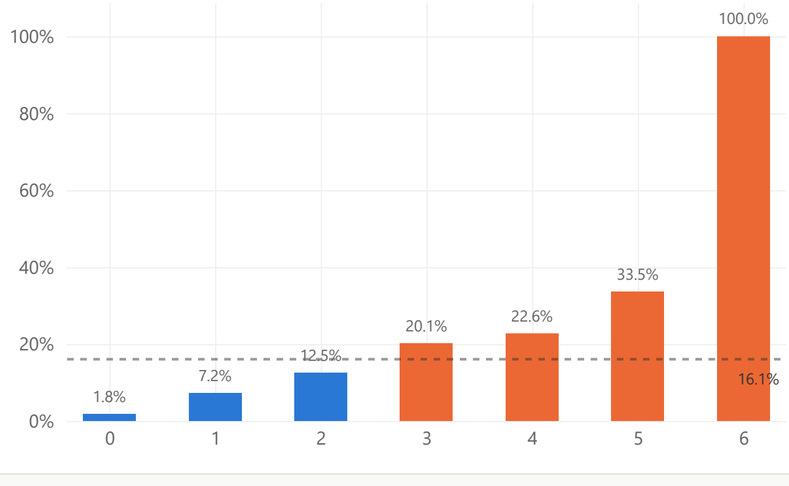

Card: All

Age Group: All

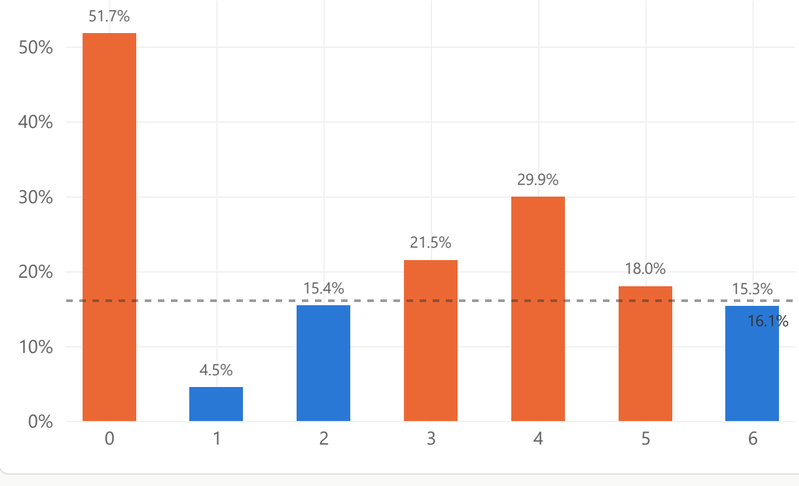

Churn rate by transactions (12 months)

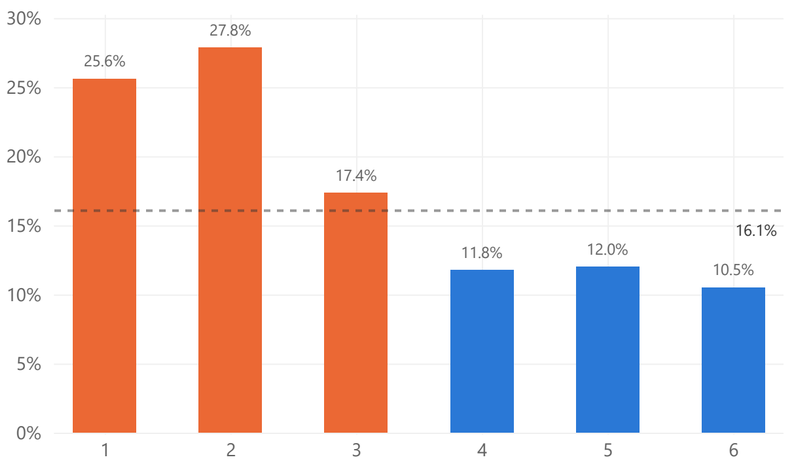

Churn rate by service contacts (12 months)

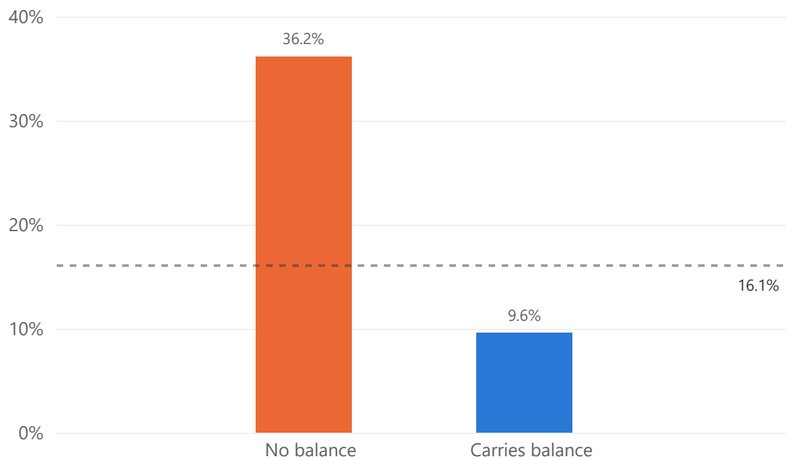

Churn rate by months inactive

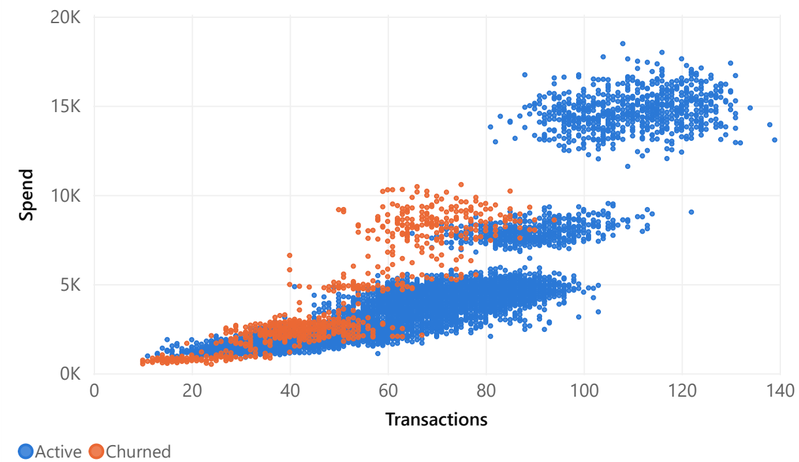

Churn rate by number of products held

Churn rate by revolving balance

Transactions vs spend (12 months)

Retention Watchlist

Rule-based risk score: 1 point per warning sign (0–6). High risk = 3 or more.
